#### Juvenile Crime

Juvenile delinquency refers to antisocial or illegal behavior by children or adolescents and is considered a serious problem all over the world. It is caused by social, economic and cultural factors. This juvenile criminality is apparent in marginal sectors of urban areas where children are exposed to violence in their immediate social environment, either as observers or as victims. Because delinquents basic education, if they have any, is poor they have been marginalized from society and destitute of any dignity or self esteem. Although most legal systems prescribe specific procedures for dealing with young criminals, such as juvenile detention centers, approaches to prevent youth from becoming delinquent should also include measures to instill equality and justice, fight poverty and create an atmosphere of hope and peace among youth. These preventive policies should be given priorities over any coercive measures.
